### BUILDING OPERATIONS

SOUTH AUSTRALIA

SEPTEMBER QUARTER 1966

SCOPE This bulletin gives information about "new building" operations in South Australia; in addition to a summary for the period 1961-62 to September 1966 it shows details concerning houses and flats, other buildings, employment in the industry, and dwellings in local government areas. The information has been compiled from returns collected from all builders of new buildings.

All values in this issue are expressed in decimal currency (\$2 = £1).

DEFINITIONS New Building: Alterations and additions of \$10,000 and over to existing buildings are included, but minor additions, alterations, repairs and renovations, and all construction activity such as railways, bridges, earthworks, water storage, etc., are excluded.

Value: All values shown exclude the value of land and, except in Table 4, represent the value of buildings upon completion (see also "Completion"). Values shown in Table 4 represent the amount of work done on new buildings during the period and are not subject to the fluctuations from period to period noted in Table 3 in the values of "new buildings other than dwellings"; these fluctuations are partly the result of the unequal incidence of individual large contracts.

Commencement: A building is recorded as commenced when work on the foundation has begun.

Under Construction: Once commenced, even though work on it may have been temporarily suspended, a building is classified as "under construction" until its "completion".

Completion: A building is regarded as having been completed when the contractor has fulfilled the terms of the contract or in the case of an owner-built house when the dwelling is either completed or occupied (whichever occurs first). However, the value in all cases is that of the building as a finished project as planned.

COMMENTS 2,570 houses were commenced and 2,728 were completed during the three months ended September 1966. Commencements were 135 more than in the June quarter 1966 and 45 more than in the September quarter 1965. Completions were 79 more than in the previous quarter but 108 less than in the September quarter 1965.

The number of flats commenced (345) was 43 less than in the preceding quarter and 71 less than the 416 commenced in the September quarter 1965. The total of 2,915 dwellings (houses and flats combined) commenced was the highest since the September quarter 1965.

Persons recorded as employed on all jobs of builders of new buildings at 30th September totalled 13,342. This is 164 less than on the 30th June 1966 and the lowest since 28th June 1963 when 12,948 were recorded.

(a) Mainly of weatherboard construction.

(b) Brick and stone veneer not separately recorded, included with brick, concrete and stone.

OWNER-BUILT HOUSES

Of the 9,395 houses commenced during 1965-66, 569 (value \$4,717,000) were owner-built, i.e. being erected by the owner or under the owner's direction by subcontract or day labour but without the services of a contractor responsible for the whole job. During September quarter 1966 there were 135 (\$1,190,000) owner-built houses commenced and 130 (\$1,137,000) completed.

	2,242	2,451	2,861	2,705	2,849	2,542	2,629	2,511
Total	12,834	13,585	15,118	14,531	14,584	14,086	13,506	13,342

Note: Building employment covers all contractors and sub-contractors and employees of contractors, sub-contractors, and Government instrumentalities, who on the day specified were actually engaged on the construction, alteration, repair, and maintenance of buildings, but excludes persons working on owner-built houses or for contractors or sub-contractors who undertake only alterations, additions, repairs, and maintenance. Persons "actually engaged" include those temporarily laid off because of weather. Some duplication may occur as a result of frequent movement between jobs or because some persons (such as electricians) may work on several jobs which are under construction simultaneously.
